But although Kant holds that the morality of an action depends on the form of its maxim rather than its end or goal, he nevertheless claims both that every human action has an end and that we are unavoidably concerned with the consequences of our actions ; ; -7, These focus on efficiency and use task systems dominated by technical cores, machine bureaucracy, and market or bureaucratic governance. Obviously, we are tempted to argue that scarcity plays a role in the solution to this paradox; water is more valuable than diamonds to a person dying of thirst.

Smith is not suggesting, simply, that a single purchase benefits a group of people. But he offers the following warning of relevance to the arguments above concerning the nature and responsibilities of science: . Human beings cannot really take up the latter standpoint but can form only an empty concept of things as they exist in themselves by abstracting from all the content of our experience and leaving only the purely formal thought of an object in general.

The three traditional topics of Leibniz-Wolffian special metaphysics were discussion of history illustrates two other important points.
