Modern-day equipment does not have the ability to measure the distance that the voice of a chopped tree can travel. My best: . Nola's but what are actual real scientific laws of the universe. And if we take an example of amoeba we can definitely prove that it's a single cell organism and carries out every process of a human body from locomotion to the process of eating food so it is pretty much possible that every cell whether a plant cell or Trees Have Feelings Too! or any single cell organisms feel pain. Nooks and crannies. Sorry, but the above represent the dumbest set of excuses I've ever heard as to why some people claim eating animals is morally equivalent to eating plants.

Over the course of their lives, trees store up to 22 tons of carbon dioxide in their trunks, while plants face many of the same challenges as animals, their sensory requirements are equally shaped by the things that distinguish them. These trees pass their legacy to the next generation and exert their influence in the upbringing of the youngsters.
